As an IT specialist with 4 years of experience, I am eager to transition into an entry-level software developer role and apply my technical expertise to writing efficient, effective code. I have a deep understanding of software development principles and am skilled in cybersecurity, database management, and software engineering. With a passion for coding, particularly backend design and a commitment to continuous learning and growth, I am confident that I can make a valuable contribution to your team. I look forward to the opportunity to put my skills to work and help drive innovation within your organization.

EXPERIENCE

JAN 2019 – PRESENT

IT SUPPORT SPECIALIST, ALPHA COMPUTER EXPERIENCE

My primary responsibility is to assist businesses with their I.T needs and troubleshoot any issues they might be having. In addition to this, a lot of my time is spent on assessing a company's I.T infrastructure and recommending solutions to improve efficiency and productivity.

- Diagnosed and resolved a wide range of software, hardware, and network connectivity issues for small businesses by going onsite or troubleshooting remotely
- Designed, implemented, administered, and tested various network infrastructures as well as performed troubleshooting, performance testing and cabling runs.
- Recommended changes to improve systems and network configurations and determine hardware or software requirements related to such changes.
- Implemented system security by configuring, monitoring, and maintaining firewall applications.
- Performed data backups and disaster recovery operations
- Implemented, managed, maintained and provided support for Linux OS systems.
- Worked in a timely manner to help resolve tickets based on urgency and priority
- Implemented, managed, and maintained Microsoft Windows Server infrastructure including Active Directory, Group Policy
